REPORT ON THREE WEBSITE PROJECTS

HTML and CSS Mini Projects

Name: **Damu Hari Kaushik**

Roll Number: **26000885**

Class / Department: **CSM-1 school of computer studies**

Subject: **Web development**

College Name: **Dr. RVR NRI INSTITUTE OF TECHNOLOGY - DEEMED TO BE UNIVERSITY**

Projects: BookNest Digital Library, LearnHub Online Learning Platform, and My Personal Portfolio.

1. Introduction

Thisreportdescribes three simple websites created using HTML and CSS. The projects are BookNest Digital Library, LearnHub Online Learning Platform, and My Personal Portfolio. Each website has a different purpose and a simple layout.

2. Objectives

• To learn the basic structure of a webpage using HTML.
• To use CSS for colours, fonts, spacing, and layout.
• To arrange webpage content into clear sections.
• To create simple cards, navigation menus, and responsive pages.

3. Tools and Technologies

HTML: Used to create thewebpagestructure, headings, sections, links, and cards.

CSS: Used to style the webpage, including colours, fonts, spacing, and layout.

Flexbox: Used to arrange navigation links and content cards.

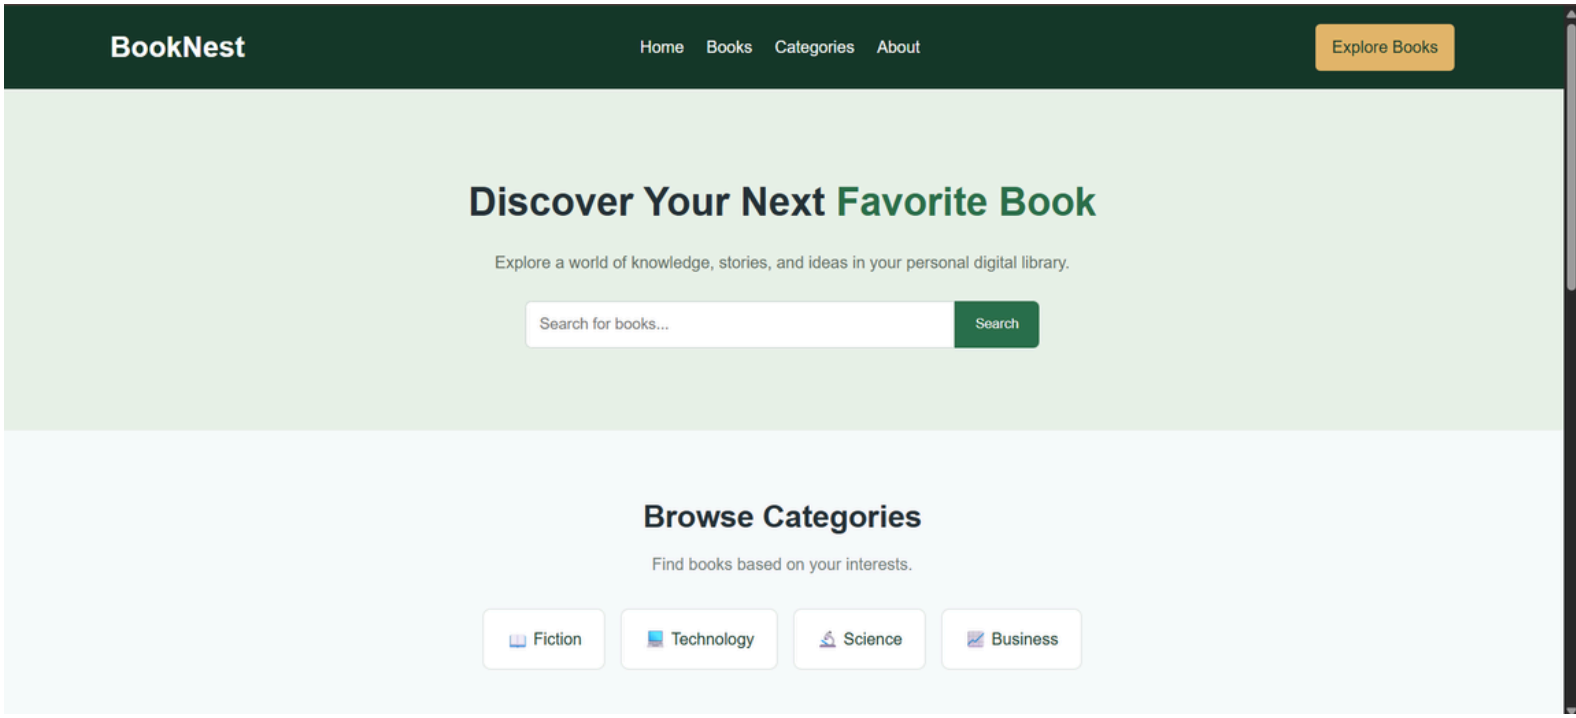

Hover effects: Used to give simple visual feedback when a visitor points to links or cards.

4. BookNest – Digital Library

BookNestis adigital library website concept.It helps readers browse books and discover different subjects. The website includes Home, Books, Categories, and About sections.

The categories are Fiction, Technology, Science, and Business. Sample books include The Great Adventure, Learn Technology, World of Science, and Smart Business.

The design uses green and gold colours. HTML organizes the content, while CSS controls the layout and appearance. The website adjusts its navigation and book cards for smaller screens.

5. LearnHub – Online Learning Platform

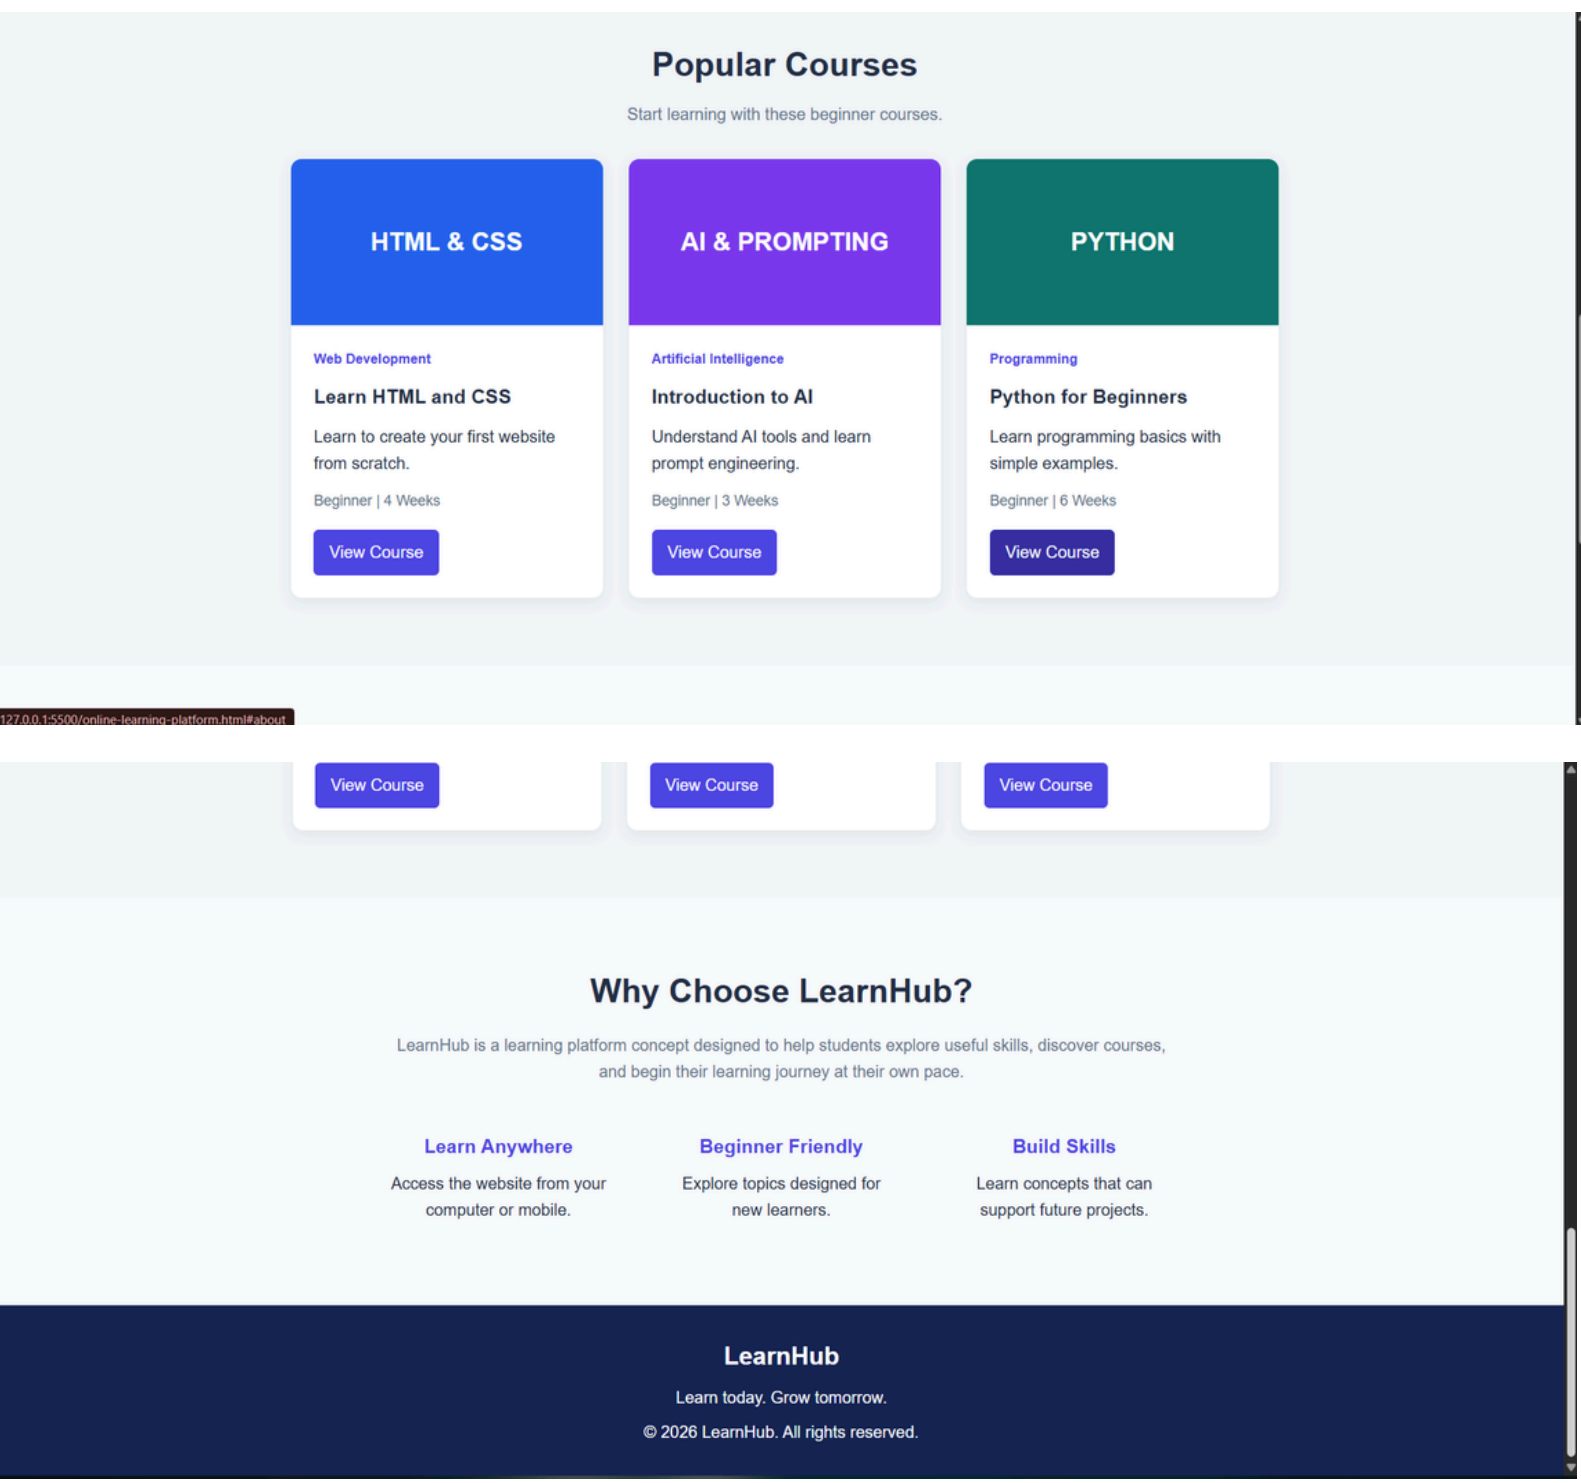

LearnHub is anonline learning platform concept. It helpsstudents explore useful subjects and beginner courses. The website includes Home, Categories, Courses, and About sections.

The categories are Web Development, Artificial Intelligence, Data Science, and Graphic Design. The featured beginner courses are HTML & CSS (4 weeks), AI & Prompting (3 weeks), and Python for Beginners (6 weeks).

The website highlights learning anywhere, beginner-friendly topics, and skill development. It uses an indigo and white design. CSS Flexbox arranges the content, and the layout adjusts for smaller screens.

6. My Personal Portfolio

Thepersonal portfolio websiteintroduces the creator, skills, and projects. It includes Home, About, Skills,

Projects, and Contact sections.

The skills displayed are Prompt Engineering, HTML & CSS, and AI Automation. The project examples are a Portfolio Website, AI Prompt Collection, and Automation Ideas.

The design uses navy blue, light blue, and white. HTML creates the page sections, while CSS controls the fonts, spacing, cards, and layout. The website includes adjustments for smaller screens.
